Okla. man charged with video voyeurism
<http://www.mcalesternews.com/breakingnews/x666708043/Okla-man-charged-with-video-voyeurism>
Associated Press

OKLAHOMA CITY - A 55-year-old McAlester man is charged in federal court with three counts of video voyeurism for allegedly setting up a hidden camera to record women in a restroom.

Authorities said Wednesday that Kenneth Elkins, who worked at the McAlester Army Ammunition Plant, allegedly installed the camera in a women's bathroom there and viewed at least three separate victims.

Elkins also faces state charges after a search of his home in the federal case turned up evidence of alleged additional crimes, including images of child pornography.

Elkins is next due in court Dec. 20 on the state charges and is scheduled for arraignment Jan. 15 in the federal case.

An attorney listed in court documents for Elkins in the federal case did not return a phone message seeking comment Wednesday.

Ammunition plant worker faces charges in voyeurism case
<http://newsok.com/ammunition-plant-worker-faces-charges-in-voyeurism-case/article/3913571>
BY SHEILA STOGSDILL . Published: December 12, 2013 Charges have been filed against a supervisor at the McAlester Army Ammunition Plant who is accused of secretly placing a camera in a women's restroom at the facility.

MCALESTER - Criminal charges have been filed against a supervisor at the McAlester Army Ammunition Plant who is accused of secretly placing a camera in a women's restroom at the federal facility.

Kenneth Wayne Elkins, 55, was charged in federal court with three counts of video voyeurism, two counts of recording obscenity and two counts of using electronic equipment in a clandestine manner, the U.S. Attorney's office in Muskogee said Wednesday.

Elkins is accused of using the hidden camera between July 1 and Aug. 19 to allegedly record women in the restroom.

He "allegedly captured an image of the private area of three separate female victims while they were using the restroom," the release said.

The charges arose from an investigation by plant security, the FBI and the McAlester Police Department. The plant is within the jurisdiction of the federal government, and crimes occurring within its boundaries are investigated and prosecuted by federal law enforcement.

As part of the investigation, a search warrant was issued for Elkins' home, where computer images of child pornography were allegedly found, along with more electronic surveillance equipment to capture an image of the private area of people in the residence, officials said.

Elkins is facing additional state charges for those alleged offenses.

McAlester Man Accused Of Hiding Cameras In Restroom At Army Ammunition Plant

<http://www.news9.com/story/24196412/mcalester-man-faces-federal-charges>

Posted: Dec 11, 2013 4:15 PM EST

Updated: Dec 11, 2013 4:15 PM EST

NewsOn6.com - email

McALESTER, Oklahoma - A McAlester man was arrested and faces federal and state charges after investigators say he put a hidden camera inside the women's restroom at the McAlester Army Ammunition Plant.

Kenneth Elkins, 55, was an employee at the plant.

Elkins is charged with three counts of federal video voyeurism, two counts of recording/transmitting obscenity. The state is also charging him with two counts of using electronic equipment in clandestine manner.

Investigators say women were videotaped using the restroom at the plant between July and August. They say Elkins captured very revealing pictures of least three of the women.

When investigators searched Elkins home they found child pornography on his computer and evidence he was recording inside a 16-year-old relative's room.

Elkins is out on bond right now and is due back in court December 20.

Subject: SEA 07 Weekly Report (1/7/2014)
Attachments: 07 Jan 2014.pdf
Signed By: michael.jabaley@navy.mil

Boss, SEA 07 weekly as follows:

1. Troubled Submarine Availabilities: Availability is deemed to be a troubled availability if assessed to be at risk to complete on time and within budget by PMS392.

A. USS NEWPORT NEWS
B. USS MARYLAND (SSBI
C. USS TOLEDO (SSN 765
D. USS HARTFORD (SSN
E. USS TEXAS (SSN 775)
F. USS BUFFALO (SSN 71
G. USS KENTUCKY (SSBN
H. USS CONNECTICUT (S
I. USS ALBUQUERQUE (S
J. USS ALBANY (SSN 753

(b)(7)(e) and (f); non-responsive

2. PAC VA Class SSN Vibration Reducer Update: A VA Class SSN reported an abnormal noise and minor oil leakage from the aft vibration reducer oil seal. PHNSY will evaluate and provide corrective actions to ship. The ship was unable to reproduce the transient noises while PHNSY personnel were aboard. Based on telecon held 1/6/14 between PHNSY and NAVSEA, NAVSEA recommends continued operations with no restrictions.

3. PRM/Rescue System Updates and Status:

A. Pressurized Rescue Module returned to PNSY on 12/29/13 following successful completion of hydrostatic testing to 1.3 MOP at NSWCCD. PRM offloaded and initial cleaning of the hull to support disassembly and inspection of the hatches commenced. Final hull cleaning, blast and paint will start this week.

B. Submarine Rescue Chamber Flyaway System (SRCFS): SRC-21 is Rescue Ready. SRC-8 repair will commence 1/7/14.

C. Atmospheric Diving System (ADS): ADS Suits 2 & 3 Rescue Ready. ADS Suit 1 (annual maintenance) and Suit 4 not Rescue Ready (joint issues). URC performing post-mission maintenance on ADS Suits 2 and 3 following recent training operations.

4. Cumulative Operational Days Lost due to CNO availability schedule overruns (11/04/13 data date):

-ST1 FY14 Prediction <667 Days Lost

-FY14 Realized Losses 421 Days

-FY14 Projected Losses 844 Days

5. Leave/Travel by 07/07B:

16/17 Jan - TDY, SSN 784 SUBSAFE Certification Audit, EB, Groton CT, 07B

30/31 Jan - TDY, SSN 784 FBW Certification Audit, EB, Groton CT, 07

Thanks and V/R,

Michael

Subject: WNY FOIA request story

Boss;

I was made aware by the task force PAO that Navy FOIA email was released to NBC4 reporter Scott McFarland. This story has been picked up by non-defense reporters on the web. Email apparently indicates Navy effort to avoid gathering and releasing much of the info that journalist sought. And Patterson accidentally sent those notes to Scott MacFarlane, the investigative reporter for NBC 4-TV in Washington who made the request. Task Force PAO has the lead, but this is the same reporter who asked to meet with you and set up an interview. Not good.... Will keep informed on this, but luckily we don't have the lead. VR/pat

Navy Accidentally Emails Reporter Its Plans to Deny His FOIA Request

Email. We love it, until it burns us. Like when you think you're sending instructions to a coworker on how to whittle down a pesky reporter's request for federal records related to the Washington Navy Yard shooting, and you realize too late that you emailed them to the reporter himself.

Robin Patterson, the Navy's public liaison, oversees the sea service's responses to Freedom of Information Act requests from reporters and private citizens seeking Navy records and data. But part of an email leaked today on social media suggests Patterson took one reporter's request and tried mightily to avoid gathering and releasing much of the info that

journalist sought. And Patterson accidentally sent those notes to Scott MacFarlane, the investigative reporter for NBC 4-TV in Washington who made the request.

The subject line of Patterson's email suggests it's "non-9_16_13 specific," and part of the request seeks imagery from "Building 197." September 6, 2013, is the date of the Washington Navy Yard shooting that left 13 of the service's employees and contractors dead; Building 197 is the Navy Yard structure where the massacre took place.

"This request is too broad to tie to the specific event," Patterson wrote in one section, apparently about a request for photographic records of the interior of Building 197. "Josh can help with crafting the language for 'fishing expedition,' or request to [sic] broad." Federal public affairs officers often decline to fulfill broad requests or nonspecific "fishing expeditions" for information, which reporters often need in order to sharpen their requests and investigative areas of focus—a classic reporting Catch-22.

Elsewhere, Patterson appears cool toward the reporter's request for memos:

Recommend that you provide the requester with an estimate, as I can see the search and review, possible redactions, will be very costly. This may encourage the requester to 'narrow the scope.' Again another 'fishing expedition'—just because they are media doesn't mean that the memos would shed light on specific government activities.

Releasers often quote FOIA requesters high costs for the collection and distribution of information in a way that seems designed less to defray taxpayer expenses and more to dissuade requesters from obtaining the records they want in the first place.

On a final request, apparently for emails, Patterson wrote, "this one is specific enough that we may be able to deny." That's another dilemma for reporters, whose requests for records can be denied for being too narrow as well as too broad.

MacFarlane first reported the email on Twitter earlier today. Understandably, he declined to share additional details with Gawker about the email until he files his own story.

The Navy's Public Affairs Office told Gawker in an email that it "is not authorized to make any statement on the veracity of alleged [Navy] products which have not been disclosed through official channels." Patterson (who is a woman, contrary to Reason magazine's report on the email) did not respond to an emailed request for comment in time for publication.

Gawker tried several times to call her office line, but it was busy. Awfully busy.

Subject: SubHDR Clean room casualty

VADM Hilarides, RADM Brady, RDML Becker,

BLUF: NUWC Newport had a steam heating pipe rupture in the SubHDR Clean Room. While the full extent of the damage is unknown, NUWC Newport has a SubHDR inventory of Ready For Issue fleets assets that will last approximately three months.

On Monday 6 Jan, we discovered a heating pipe burst in one of our antenna repair facilities; specifically, the Submarine High Data Rate (SubHDR) national repair function. A heat pipe ruptured in the Clean Room at some point over the weekend creating a steam room-like environment causing significant moisture in the room to accumulate on test equipment, several mast antennas that were undergoing repair, as well as a significant number of spare parts.

None of the equipment was energized during this incident.

The equipment in the lab has been removed and was placed in a thermal environmental chamber. The chamber will allow us to thoroughly dry the systems and test equipment. Once we've completed that process we intend to power them up gradually to determine whether any damage has occurred and to what extent. Once we've had an opportunity to bring the equipment back on line, which will start in a few days, we will determine the extent of any damage, and assess any cost or potential fleet impacts.

Based upon fleet usage, we have an inventory of enough Ready For Issue fleet assets (12) to last approximately (b)(6); non-responsive. months.

PMW-770 has been informed and SUBLANT/SUBPAC will be informed by close of business today. We intend to send a Unit Sitrep today and are evaluating if a Mishap Investigation/report is required. A critique will be conducted this week.

We do not have an estimate of the cost of the damage until we understand what can be repaired after the drying. I will provide an update Friday.

Naval Aviation Leaders,

Along with LtGen Schmidle, Deputy Commandant for Aviation, USMC, and VADM Dunaway, Commander Naval Air Systems Command, I am sending you the latest Naval Aviation Enterprise Strategic Plan. It represents the framework for action in the years ahead. This plan, our fourth, focuses on three strategic objectives: cost-wise current readiness, cost-wise future readiness, and creating an environment that rewards a collaborative culture. We believe that these focus areas will best assist us in achieving and sustaining the right balance of readiness and cost.

I ask you to read this plan thoroughly and to find where you plug in. It is important to Naval Aviation that you leverage this plan to benefit your command through increased readiness. Everyone on our team - Sailors, Marines, pilots, maintainers, civilians, contractors - needs to look for ways to keep Naval Aviation readiness where it needs to be, and to do it more efficiently. Today's geopolitical and fiscal environments make this more important than ever before.

Share this plan within your chain of command. Make sure that your people read it and that they also understand what it means for them, as well as for Naval Aviation.

The Enterprise was created with austere fiscal circumstances in mind. Those fiscal times envisioned are here now. Your full support and dedication to our mission of advancing and sustaining Naval Aviation warfighting capabilities at an affordable cost is essential.

If you have questions or comments, please contact

(b)(6)

Subject: Leading Innovation - Energy Application Focus Course
Signed By: robert.erskine@navy.mil

Sensitivity: Private

Good afternoon Willy. I hope all is well for you.

I need your assistance with one of our upcoming Flag officer executive education courses. We have the Leading Innovation - Energy Application Focus (LIEAF) course, formerly Leading Innovation (LI), at the Naval Postgraduate School February 24-28, 2013.

You were a true asset to us last year in the Leading Innovation course, and we would very much like for you to participate again this year. We have added an energy application focus to the course, however, innovation is at the core of the course. Your insights remain valuable to the panel, and we would like for you to reprise your discussion on innovation in the Virginia class roll out and lessons learned as a leader of innovation.

Your participation is requested on Friday morning, Feb 28. You will have a 45-minute slot as well as a Q & A session at the end of the morning. We ask that you be available from 0800-1200 on Feb 28.

Please give me a call or provide an email response letting me know of your availability the morning of 28 Feb, and I will pass your contact information to (b)(6) the course chair for Leading Innovation.

All the best. Vr/bob

Subject: Inadvertent FOIA release
Signed By: (b)(6) @navy.mil

Gentlemen,

Earlier today, DNS-36 (NAVY FOIA) inadvertently released an internal email between their office and NAVSEA's FOIA office to local NBC4 reporter, Scott MacFarlane.

MacFarlane's FOIA request concerned the Sept. 16 Navy Yard shooting.

The internal email contained the comments: 1) "just because they are media doesn't mean that the memos would shed light on specific government activities" and 2) "fishing expeditions" which the reporter interpreted as Navy's efforts to "dodge" his information request.

The reporter tweeted that email with the following: "EPIC FAILURE- U.S. Navy accidentally sends reporter its strategy memo for dodging his FOIA request." <https://twitter.com/MacFarlaneNews/status/420581517941678080/photo/1>

We have issued our own tweets expressing regret for the error and our commitment to transparency.

There has not been significant media interest to this point. We will use the following statement to respond to queries:

"The Navy regrets the content and release of an internal email sent earlier today to a reporter at NBC 4. The Department of the Navy staff will review procedures to ensure we are in compliance with standard Navy directives and continue to provide the public accurate and timely information. We remain committed to transparency and responding to FOIA requests in a professional manner. "

v/r,
